The screenshot displays the IBM Watson IoT Platform interface. At the top, the navigation bar includes 'Overview', 'Actions', 'Device Types', and 'Interfaces'. A table lists devices, with 'NANDY' (Device ID: 12345) highlighted. Below the table, the 'Recent Events' tab is active, showing a stream of data events. The events table has columns for Event, Value, Format, and Last Received. The events are JSON objects containing 'Normal Distance' values. At the bottom, a status bar indicates '0 Simulations running'.

Event	Value	Format	Last Received
Data	{\"Normal Distance\":47.96}	json	a few seconds ago
Data	{\"Normal Distance\":47.96}	json	a few seconds ago
Data	{\"Normal Distance\":47.96}	json	a few seconds ago
Data	{\"Normal Distance\":47.97}	json	a few seconds ago
