PROBLEM -SOLUTION FIT   TEAM ID: PNT2022TMID42771   PROJECT TITLE: Signs with smart connectivity for better road safety

1. CUSTOMER SEGMENT(S) `CS`

Customer have to give detailed information about their problems and want to say how this problem arrived.

6. CUSTOMER CONSTRAINTS `CC`

The device should be user friendly and an driver get information about trasversed roads,traffic conditions and weather conditions

5. AVAILABLE SOLUTIONS `AS`

During this device the user can sort listed related to their problems. device can approach the different ways to solve the problem.

2. JOBS-TO-BE-DONE / PROBLEMS `J&P`

Many people are unaware to using mobile phones and drivers get interact with others, These are leads to major accident ..

9. PROBLEM ROOT CAUSE `RC`

The people want to solve the problem in very quickly so the device could give more ways and take minimum time to solve the drivers problem .

7. BEHAVIOUR `BE`

If the people says their problem .An agent is assigned to each customer. With the help of the device can solve their queries and give it notified message.

3. TRIGGERS `TR`

In this people care an agent can give notification about your level of problem completion.

4. EMOTIONS: BEFORE / AFTER

Before we don't know how and where to ask solution to problem but after we solve the problem through online and a assigned agent can help to solve the people's problem. `EM`

10. YOUR SOLUTION `SL`

My solution is some smart devices are used to avoiding over speed. and following speed limit and improving visibility and road lightings these device used to avoid accidents. then control their speed limit.

8. CHANNELS of BEHAVIOUR `CH`

An device can give a better of better solution and also different ways to solve the people queries,
